

Job Description

Job title: Senior Web Developer
Reporting to: Head of Technology
Location: Kelana Jaya, Selangor.

Founded in 2015, Carsome is Malaysia's first online automotive portal that connects car buyers and sellers to new and used car dealers respectively, providing them a platform to trade seamlessly. For car selling, Carsome empowers sellers to sell their cars in less than 24h with full transparency and no paperwork hassle, and ensures dealers a constant first-class supply of thoroughly inspected cars. For car buying, Carsome guarantees buyers the best offers in town by providing up to 5 upfront offers, and dealers a cost-effective channel to genuine leads.

Job Overview

We are looking for someone who can Design, develop and maintain Carsome's dynamic, interactive web-based systems that are scalable in both performance and maintainability. A highly motivated individual who can thrive in a fast pace environment and successfully contribute to the team. Our goal is to find someone who is experienced with implementing cutting edge web development techniques. The ideal candidate will have a can-do attitude, passion for technology, extensive development experience, and will be able to get up to speed quickly.

Responsibilities

- Define and design software architectures: explore existing systems, determine areas of complexity and potential risks to successful implementation
- Follow coding standards (preferably PSR Best Practices)
- Improves Carsome's operations by conducting systems analysis; recommending changes in policies and procedures
- Manage high availability software throughout entire life cycle for development from requirement gathering, design, development and maintenance phase
- Provide optimized web application solutions
- Integrate web services with third party clients such as AWS
- Basic server administration skills to manage linux based servers

Required Technical Skills

- Programming Languages: PHP (5years +), nodejs (2 years+), HTML5 (5 years+), Javascript (5 years +)
- Frameworks: Codeigniter 3.x, Laravel, Phalcon
- Tools: Doctrine, PHP Unit, Redis, Bash, memcached
- Web Concepts: REST, JSON, XML, OOP, Dependency Injection, SOAP
- Collaborative Integration: Git, Bitbucket
- Agile Methodology: Scrum, Kanban

Requirements

- Solid Computer Science fundamentals, excellent problem solving skills
- 3-6 years of backend or frontend development in a product company, with a proven track record of shipping successful software products.
- Deep experience in most of our tech stack or similar technologies.
- Bachelor's or Master's degree in Computer Science or related field
