

Job Description

Job title: Software Engineer in QA
Reporting to: Head of Technology
Location: Kelana Jaya, Selangor.

Founded in 2015, Carsome is Malaysia's first online automotive portal that connects car buyers and sellers to new and used car dealers respectively, providing them a platform to trade seamlessly. For car selling, Carsome empowers sellers to sell their cars in less than 24h with full transparency and no paperwork hassle, and ensures dealers a constant first-class supply of thoroughly inspected cars. For car buying, Carsome guarantees buyers the best offers in town by providing up to 5 upfront offers, and dealers a cost-effective channel to genuine leads.

Job Overview

We are looking for someone to work with the product team to understand requirements to design comprehensive test plans and test cases. A highly motivated individual who can thrive in a fast paced environment and successfully contribute to the team. Our goal is to find someone who is experienced with implementing cutting edge QA standards. The ideal candidate will have a can-do attitude, passion for technology, extensive development experience, and will be able to get up to speed quickly.

Responsibilities

- Execute the plans to thoroughly test all software releases under your charge, which can include client and server side products, API platform and server infrastructure.
- Significantly increase our test automation coverage. Manually test software for which automation is not available yet.
- Help define, implement and drive adoption of QA best practices and processes. Proactively help improve processes.
- Support other test areas including performance, load, security

Required Technical Expertise

- Programming Languages: PHP (5years +), nodejs (2 years+), HTML5 (5 years+), Javascript (5 years +)
- Frameworks: Codeigniter 3.x, Laravel, Phalcon
- Tools: Selenium, Doctrine, PHP Unit, Redis, Bash
- Web Concepts: REST, JSON, XML, OOP, Dependency Injection, SOAP
- Collaborative Integration: Git, Bitbucket
- Agile Methodology: Scrum, Kanban

Required skills / Education

- 2-5 years of hands-on experience in automated and manual testing in web and mobile apps.
- Bachelor's degree in Computer Science or related field
- Deep understanding of software QA, including best practices, processes and all kinds of testing.
- Highly skilled in automated test tools for web, mobile and server-side software.
- Hands-on experience with programming in a scripting language.
- Excellent verbal and written communication skills.
